Assignment 1030 Feedback

This feedback is effectively a code review; to keep it concise, notes are provided as a numbered list. Inline comments in your code illustrate an example of the numbered item (there may be more). Asterisks (*) denote high-priority issues. If any code review item is unclear or if the resulting proficiencies are not self-explanatory, please ask me.

Updates for commits up to 12/16/2014 are shown inline:

1. Sledgehammer-y approach to updating the user interface upon character create, edit, and delete (*3b, 4a*)

2. Minimal help seen (just that instructional paragraph) (*3a, 4a*)

3. Tabs in the source code (*4c*) …*leftovers in HTML*

4. ~~***No doctype element (*4a*)~~

5. Incorrect/inconsistent indentation (*4c*) …*gaaaaa almost*

6. Non-descriptive names; some are copy-paste holdovers (*4c*)

7. Misplaced references: CSS should be in `head`; scripts should be at the end, yes, but *within* the `body` element (*4a*) …*missed it by that much*

8. ~~Unbalanced HTML element tag (i.e., missing start or missing end) (*4a*)~~

9. Inadequate/inconsistent spacing: space before braces; space after most punctuation (commas, semicolons, colons, etc.); separate function arguments; etc. (*4c*) …*another close one*

10. ~~Potential consolidation: collapse repetitive statements into an iteration (*4b*)~~

11. ~~Use conditional expressions for `if` statements whose branches differ only by value (*4b, 4c*)~~

12. Use an `a || b` expression for conditionally choosing based on falsiness of `a` (*4a, 4c*)

13. ~~JSON callback with no apparent real effect? (*4a*)~~

14. Clean up obsolete code…this led me astray for a few minutes! Remember you can always go back to some code via version control. (*4c, 4e*)
